

## Claims

1. (Previously submitted) Magnetic work apparel comprising:
  - an elongated belt member having two opposing ends with mating fasteners adjacent each end for securing said belt about a wearer's waist;
  - at least one magnet embedded within said belt member;
  - a plurality of fasteners positioned on said belt member;
  - a magnetic accessory apparel item removably securable to said fasteners.
2. (Previously submitted) The magnetic apparel according to claim 1 wherein said accessory item comprises:
  - a glove having a wrist portion, a hand portion extending from said wrist portion, said hand portion including a backhand portion with a magnet embedded therein;
  - a fastener means positioned adjacent said wrist portion for mating with said fastener on said belt to secure said glove thereto.
3. (Previously submitted) The magnetic work apparel according to claim 1 wherein said accessory item includes a belt clip having a magnet embedded therein.
4. (Previously submitted) The magnetic work apparel according to claim 1 wherein said accessory item includes a wrist band having two opposing ends, each having a mating attachment means adjacent thereto for securing the wristband about a wearer's wrist, said wristband having a magnet embedded therein;
  - a fastener means positioned on said wristband for mating with said fastener means on said belt.
